

MHP Case Study

Project officer's name	Edward Sentamu
Your email & cell number (in case follow up is required)	eddiese2002@yahoo.com / 0782963611
Implementing Partner	Sicklecell Association of Uganda
Location of case study (district and sub-county)	Mubende District, Nalutuntu Subcounty
Period (State the time period covered by this story)	July – September 2014
Case study title (no more than 20 words; try and use a title that catches people's attention)	Availing Water at Mirembe HCII
Background (Give brief background or context to the story)	Mirembe HCII bought a Water Tank to harvest rain water. It so happened that the water tap got spoilt by the users. The facility could not access water for a period of time.
Focus (Explain the core of the case study; this might be a problem or incident or result. State which project result area the story links to.)	The facility had been facing a problem of water for a period of three months yet this water was very necessary for example in cleaning the facility, washing used equipment and other water usage. The patients were also using that same water for cleaning themselves. Result area 2
The story? (Summarise the sequence of events, who did what, any challenges faced and how they were overcome)	SAU facilitated the Health Unit Management Committee at Mirembe HCII and made a resolution that requested the In charge to purchase a silver tap and place it on the water tank for water availability.
The result (what was the end result of what happened? Was it a positive outcome or a negative outcome? Remember to identify the sources of your information)	After the HUMC resolution, the in charge bought the tap and placed it on the water tank for water accessibility at the facility.
The message (what message or messages do you want people to take from this case study? i.e. why did you want them to know the story?)	Functionality of the HUMC at the facility can cause a change at the facility.
Lessons learned (overall, what does the case study tell us? What have we learned? What lesson do we want to	Health Unit Management Committees once facilitated they can affect the changes at the facility by taking meaningful decisions.

share with others?Remember not to draw conclusions unless the information in the case study supports them)	
Future plans (Is anything going to change as a result of what happened?)	Yes, there is now availability of water at the facility for both health workers and patient usage.
Quotes (remember to give details of who said what. If service providers or officials are quoted, remember to state their affiliation/job title?)	As the committee chairman “We thank the In charge for fulfilling his pledge of buying a silver tap our water tank and now the facility has got water for use”. Mr. Lubonera Yokana
Additional information (Anything else you want to mention? Is there any other information that readers might find useful about this case study or limitations as to how the idea might be utilised)	
Confidentiality / approval (Did you ask permission for the story to be shared? Have you changed any names to preserve confidentiality?)	Health Unit Management Committee minutes that were held on 10/9/14 (Minute 4)
Photos (Are you sending any photos? If so, list the file names and explain what/who each picture shows?)	No
